

# Trim winder

Blue Eye

Technical solution through innovation

## Description

**BLUE EYE** Trim winders incorporate many features for high reliability of trim winding. It's an valuable concept to add the value by rewinding and processing the trim produced By converting machines, like slitting, Extrusion, pouch making and many more.....

## Standard Features

- ◆ Fully mechanical controlled traversing
- ◆ Pineapple winding profile
- ◆ Cantilevered winding shaft
- ◆ Dancer with ultrasonic sensor
- ◆ Noiseless device
- ◆ Variable traversing rate
- ◆ Low power consumption
- ◆ Effective trim storage
- ◆ Keep your floor clean
- ◆ Quality engineered and manufactured.

## Optional

- ◆ Pull roll for constant pull during roll change
- ◆ winding to minimize waste
- ◆ Winding of 2 trims on one winder
- ◆ Trim break detector

## Typical Specifications

Trim Winder	
Trim width	5 to 60 mm
Web thickness	10µm to 1 mm
Package diameter	350 mm
Package width	350 mm
Core diameter	100 mm
Maximum Speed	500 m/min

## Typical Materials

Film - OPP, PET, PE, PVC	Medical	Foam tapes
Non-woven	Packaging films	Laminates

As per material.
